*Visser's Annotated European Patent Convention 2021 Edition* Nov 24 2021 The book, Visser's Annotated European Patent Convention, is a commentary on the European Patent Convention and a bestseller in European patent law. The 2021 edition of this preeminent work – the only regularly updated authoritative article-by-article commentary in English on the European Patent Convention (EPC), its implementing regulations, and associated case law provides the complete text of the law annotated with commentary and expert guidance on the interpretation of each paragraph. Since its first edition in 1994 it has provided the European patent community with the necessary insights to practice successfully before the European Patent Office. The EPO recommends the Visser's Annotated European Patent Convention as the first book in its list of non-EPO/WIPO literature to be used for the preparation of the European qualifying examination. In addition to a thorough updating of developments, new material in the 2021 edition includes the following: Amended EPO Guidelines that entered into force on 01.03.2021 Consolidated discussion of procedures relating to oral proceedings held by video conference Commentary on recent amendments to the implementing regulations Recent decisions of the boards of appeal The 2021 edition is suitable for candidates preparing for the EQE 2022. A free supplemental note will be published providing candidates with an overview of the main legal changes between the 2021 edition and the 31.10.2021 legal cut-off date for the EQE 2022.

**Progress in Episodic Memory Research** Jun 19 2021 Episodic memory refers to the ability to remember personal experiences in terms of what happened and where and when it happened. Humans are also able to remember the specific perceptions, emotions and thoughts they had during a particular experience. This highly sophisticated and unique memory system is extremely sensitive to cerebral aging, neurodegenerative and neuropsychiatric diseases. The field of episodic memory research is a continuously expanding and fascinating area that unites a broad spectrum of scientists who represent a variety of research disciplines including neurobiology, medicine, psychology and philosophy. Nevertheless, important questions still remain to be addressed. This research topic on the Progress in Episodic Memory Research covers past and current directions in research dedicated to the neurobiology, neuropathology, development, measurement and treatment of episodic memory.

**Harmful and Undesirable** Jun 07 2020 Like every totalitarian regime, Nazi Germany tried to control intellectual freedom by censoring books. Between 1933 and 1945, the Hitler regime orchestrated a massive campaign to take control of all forms of communication. In 1933, there were 90 book burnings in 70 German cities. Indeed, Werner Schlegel, an official in the Ministry of Propaganda, called the book burnings "a symbol of the revolution." In later years, the regime used less violent means of domination. It pillaged bookstores and libraries and prosecuted uncooperative publishers and dissident authors. In *Harmful and Undesirable*, Guenter Lewy analyzes the various strategies that the Nazis employed to enact censorship and the government officials who led the attack on a free intellectual life, including Martin

Bormann, Philipp Bouhler, Joseph Goebbels, and Alfred Rosenberg. The Propaganda Ministry played a leading role in the censorship campaign, supported by an array of organizations at both the state and local levels. Because of the many overlapping jurisdictions and organizations, censorship was disorderly and erratic. Beyond the implementation of censorship, Lewy describes the plight of authors, publishers, and bookstores who clashed with the Nazi regime. Some authors were imprisoned. Others, such as Gottfried Benn, Werner Bergengruen, Gerhart Hauptmann, Ernst Jünger, Jochen Klepper, and Ernst Wiechert, became controversial "inner emigrants" who chose to remain in Germany. Some of them criticized the Nazi regime through allegories and parables. Ultimately, Lewy paints a fascinating portrait of intellectual life under the Nazi dictatorship, detailing the dismal fate of those who were caught in the wheels of censorship.
