The uneasy balance between these worlds is shattered when Starr witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil's name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. They embark on a furtive love affair, and are soon cloistered in a premature intimacy by the unrest roiling their city. When it explodes, turning familiar streets into a patchwork of checkpoints and bomb blasts, they begin to hear whispers about doors—doors that can whisk people far away, if perilously and for a price. As the violence escalates, Nadia and Saeed decide that they no longer have a choice. Leaving their homeland and their old lives behind, they find a door and step through. . . . *Exit West* follows these remarkable characters as they emerge into an alien and uncertain future, struggling to hold on to each other, to their past, to the very sense of who they are. Profoundly intimate and powerfully inventive, it tells an unforgettable story of love, loyalty, and courage that is both completely of our time and for all time.

Changing Connectomes May 06 2020 An up-to-date overview of the field of connectomics, introducing concepts and mechanisms underlying brain network change at different stages. The human brain undergoes massive changes during its development, from early childhood and the teenage years to adulthood and old age. Across a wide range of species, from *C. elegans* and fruit flies to mice, monkeys, and humans, information about brain connectivity (connectomes) at different stages is now becoming available. New approaches in network neuroscience can be used to analyze the topological, spatial, and dynamical organization of such connectomes. In *Changing*

Connectomes, Marcus Kaiser provides an up-to-date overview of the field of connectomics and introduces concepts and mechanisms underlying brain network changes during evolution and development. Drawing on a range of results from experimental, clinical, and computational studies, Kaiser describes changes during healthy brain maturation and during brain network disorders (including such neurodevelopmental conditions as schizophrenia and depression), brain injury, and neurodegenerative disorders including dementia. He argues that brain stimulation is an area where understanding connectome development could help in assessing long-term effects of interventions. *Changing Connectomes* is a suitable starting point for researchers who are new to the field of connectomics, and also for researchers who are interested in the link between brain network organization and brain and cognitive development in health and disease. Matlab/Octave code examples available at the MIT Press website will allow computational neuroscience researchers to understand and extend the shown mechanisms of connectome development.

Rural Change in Australia Aug 28 2019 New twenty-first century economic, social and environmental changes have challenged and reshaped rural Australia. They range from ageing populations, youth out-migration, immigration policies (that seek to place skilled migrants in rural Australia), tree changers, agricultural restructuring and new relationships with indigenous populations. Challenges also exist around the 'patchwork economy' and the wealth that the mining boom offers some areas, while threatening regional economic decline in others. Rural Australia is increasingly not simply a place of production of agriculture and minerals but an idea that individuals seek and are encouraged to consume. The socio-economic implications of drought, water rights and changing farming practices, have prefaced new social, cultural and economic reforms. This book provides a contemporary perspective on rapidly evolving population, economic and environmental changes in 'rural and regional Australia', itself a significant concept. Bringing together a range of empirical studies, the book builds on established rural studies themes such as population change, economic restructuring and globalisation in agriculture but links such changes to environmental change, culture, class, gender, and ethnic diversity. Presenting

original and in-depth interventions on these issues and their intersections, this book assembles the best of contemporary research on rural Australia.

A Wrinkle in Time Dec 25 2021 A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

Into the Wild Sep 02 2022 Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of

sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

[Routledge Handbook of Comparative Constitutional Change](#) Oct 30 2019 Comparative constitutional change has recently emerged as a distinct field in the study of constitutional law. It is the study of the way constitutions change through formal and informal mechanisms, including amendment, replacement, total and partial revision, adaptation, interpretation, disuse and revolution. The shift of focus from constitution-making to constitutional change makes sense, since amendment power is the means used to refurbish constitutions in established democracies, enhance their adaptation capacity and boost their efficacy. Adversely, constitutional change is also the basic apparatus used to orchestrate constitutional backslide as the erosion of liberal democracies and democratic regression is increasingly affected through legal channels of constitutional change. *Routledge Handbook of Comparative Constitutional Change* provides a comprehensive reference tool for all those working in the field and a thorough landscape of all theoretical and practical aspects of the topic. Coherence from this aspect does not suggest a common view, as the chapters address different topics, but reinforces the establishment of comparative constitutional change as a distinct field. The book brings together the most respected scholars working in the field, and presents a genuine contribution to comparative constitutional studies, comparative public law, political

science and constitutional history.
