Sword and Citadel Mar 29 2022 Recently voted the greatest fantasy of all time, after *The Lord of the Rings* and *The Hobbit*, Gene Wolfe's *The Book of the New Sun* is an extraordinary epic, set a million years in the future, on an Earth transformed in mysterious and wondrous ways, in a time when our present culture is no longer even a memory. Severian, the central character, is a torturer, exiled from his guild after falling in love with one of his victims, and journeying to the distant city of Thrax, armed with his ancient executioner's sword, Terminus Est. This edition contains the second two volumes of this four volume novel, *The Sword of the Lictor* and *The Citadel of the Autarch*. *Hexaflexagons and Other Mathematical Diversions* Oct 04 2022 Martin Gardner's Mathematical Games columns in *Scientific American* inspired and entertained several generations of mathematicians and scientists. Gardner in his crystal-clear prose illuminated corners of mathematics, especially recreational mathematics, that most people had no idea existed. His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him. These columns were both a revelation and a gift when he wrote them; no one--before Gardner--had written about mathematics like this. They continue to be a marvel. This volume, originally published in 1959, contains the first sixteen columns published in the magazine from 1956-1958. They were reviewed and briefly updated by Gardner for this 1988 edition.

The Role of Telehealth in an Evolving Health Care Environment Dec 02 2019 In 1996, the

Institute of Medicine (IOM) released its report *Telemedicine: A Guide to Assessing Telecommunications for Health Care*. In that report, the IOM Committee on Evaluating Clinical Applications of Telemedicine found telemedicine is similar in most respects to other technologies for which better evidence of effectiveness is also being demanded. Telemedicine, however, has some special characteristics-shared with information technologies generally-that warrant particular notice from evaluators and decision makers. Since that time, attention to telehealth has continued to grow in both the public and private sectors. Peer-reviewed journals and professional societies are devoted to telehealth, the federal government provides grant funding to promote the use of telehealth, and the private technology industry continues to develop new applications for telehealth. However, barriers remain to the use of telehealth modalities, including issues related to reimbursement, licensure, workforce, and costs. Also, some areas of telehealth have developed a stronger evidence base than others. The Health Resources and Service Administration (HRSA) sponsored the IOM in holding a workshop in Washington, DC, on August 8-9 2012, to examine how the use of telehealth technology can fit into the U.S. health care system. HRSA asked the IOM to focus on the potential for telehealth to serve geographically isolated individuals and extend the reach of scarce resources while also emphasizing the quality and value in the delivery of health care services. This workshop summary discusses the evolution of telehealth since 1996, including the increasing role of the private sector, policies that have promoted or delayed the use of telehealth, and consumer acceptance of telehealth. *The Role of Telehealth in an Evolving Health Care Environment: Workshop Summary* discusses the current evidence base for telehealth, including available data and gaps in data; discuss how technological developments,

including mobile telehealth, electronic intensive care units, remote monitoring, social networking, and wearable devices, in conjunction with the push for electronic health records, is changing the delivery of health care in rural and urban environments. This report also summarizes actions that the U.S. Department of Health and Human Services (HHS) can undertake to further the use of telehealth to improve health care outcomes while controlling costs in the current health care environment.

The First Book of Fashion Apr 29 2022 This captivating book reproduces arguably the most extraordinary primary source documents in fashion history. Providing a revealing window onto the Renaissance, they chronicle how style-conscious accountant Matthäus Schwarz and his son Veit Konrad experienced life through clothes, and climbed the social ladder through fastidious management of self-image. These bourgeois dandies' agenda resonates as powerfully today as it did in the sixteenth century: one has to dress to impress, and dress to impress they did. The Schwarzes recorded their sartorial triumphs as well as failures in life in a series of portraits by illuminists over 60 years, which have been comprehensively reproduced in full color for the first time. These exquisite illustrations are accompanied by the Schwarzes' fashion-focussed yet at times deeply personal captions, which render the pair the world's first fashion bloggers and pioneers of everyday portraiture. The First Book of Fashion demonstrates how dress - seemingly both ephemeral and trivial - is a potent tool in the right hands. Beyond this, it colorfully recaptures the experience of Renaissance life and reveals the importance of clothing to the aesthetics and every day culture of the period. Historians Ulinka Rublack's and Maria Hayward's insightful commentaries create an unparalleled portrait of sixteenth-century dress that is both strikingly modern and thorough in its description of a true Renaissance fashionista's wardrobe. This first English translation also includes a bespoke pattern by TONY award-winning costume designer and dress historian Jenny Tiramani, from which readers can recreate one of Schwarz's most elaborate and politically significant outfits.

The First Binding Nov 24 2021 All legends are born of truths. And just as much lies. These are mine. Judge me for what you will. But you will hear my story first. I buried the village of Ampur under a mountain of ice and snow. Then I killed their god. I've stolen old magics and been cursed for it. I started a war with those that walked before mankind and lost the princess I loved, and wanted to save. I've called lightning and bound fire. I am legend. And I am a monster. My name is Ari. And this is the story of how I let loose the first evil. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Carefully selected by Jon Stallworthy, a professor emeritus of English at the University of Oxford, these poems comprise a landmark publication that reflects the disparate experiences of war through the voices of the soldiers themselves. The First Century Aramaic Bible in Plain English (The Torah-The Five Books of Moses) Apr 05 2020 This is a prose English and very literal translation of the first five books of the Old Testament (The Torah). Aramaic was the language of Jesus and of 1st century Israel. The Peshitta Bible is the world's first entire Christian Bible. The Peshitta Old Testament is itself a translation of the Hebrew Bible completed in the 1st century AD, according to the available evidence. No Peshitta scholar places the Peshitta OT later than the 2nd century AD. As such, it gives an early look at the state of the Hebrew Bible at that time, since Aramaic and Hebrew are sister Semitic languages and about as close to each other as any two languages can be, sharing the same alphabet, writing, grammar, much vocabulary and even similar pronunciation of many words. Some of the original Old Testament is Aramaic, such as Daniel chapters 2 through 7 inclusive, and Ezra 4 through much of 7. It even appears in a verse of Genesis 31 and one verse in Jeremiah 10:11. 228 pages, hardback.

Irish Aces of the RFC and the RAF in the First World War May 19 2021 The First World War had an enormous impact on Ireland. Over 240,000 Irish men and women volunteered to serve with the Allied forces, suffering almost 40,000 casualties. The Irish contribution to the air war remains overlooked, not just in Ireland, but also by historians generally. Although just 6,000 Irish served with the Allied flying services at a cost of 500 casualties, their impact was out of all proportion to their numbers. The contribution of Irish aces of the RFC and RAF to the Allied cause was enormous, just over thirty of whom accounted for 400 enemy aircraft. Irishmen such as Mannock, McElroy and Hazell were among the highest-scoring pilots of the war. Some were revered by their men, others were controversial figures - reckless with their own lives and those under their command - but many of their stories remain untold. This book seeks to restore all those who were written out of Irish history, while also providing for their achievements to be considered in the overall context of the first air war. Illustrations: 24 black-and-white photographs

US Mechanized Infantryman in the First Gulf War Apr 17 2021 In many ways the end of the Vietnam War left the US army a spent force. Plagued by low morale, drug and race issues, and terrible public relations, the army faced an uphill climb in the effort to rebuild itself. The story of this reconstruction is mirrored in the rise of the Mechanized Infantryman. Deciding that the key to future conflict lay in highly trained and mobile warriors that could be delivered quickly to battle, the army adopted the mechanized infantryman as its frontline troops. This new, all volunteer force was given the best training and equipment. Most notably, they were to be deployed onto the battlefield from the new M2 Bradley Armoured Fighting Vehicle. This new breed of American warriors got their first test in the First Gulf War. Fighting in the deserts of Kuwait and Iraq, these soldiers proved that the US Army was once again a force with which to be reckoned. This book tells the story of the rise of the US mechanised infantryman, focusing on his recruitment, training, lifestyle and combat experiences in Iraq.

Housing in the Twenty-first Century Jul 09 2020 The Housing Act of 1949 called for a decent home and suitable living environment for every American. The progress toward this goal over the last fifty years is generally a story of success. Kent Colton documents the remarkable progress in the areas of housing production, homeownership, and rental housing, the transformation of the nation's housing finance system, the role of government, and the place of housing in the economy. However, significant challenges remain and new issues have arisen. This work looks to the future using case studies developed during the author's fifteen-year tenure as head of the National Association of Home Builders and includes discussions of real-world problems and the people involved. Highlighting the process of developing and implementing housing policy given the great challenges of working with many diverse interests, the author outlines a housing policy framework based on a set of principles for achieving common ground.

The Bluest of Blues Oct 24 2021 A gorgeous picture book biography of botanist and photographer Anna Atkins—the first person to ever publish a book of photography After losing her mother very early in life, Anna Atkins (1799–1871) was raised by her loving father. He gave her a scientific education, which was highly unusual for women and girls in the early 19th century. Fascinated with the plant life around her, Anna became a botanist. She recorded all her findings in detailed illustrations and engravings, until the invention of cyanotype photography in 1842. Anna used this new technology in order to catalogue plant specimens—a true marriage of science and art. In 1843, Anna published the book *Photographs of British Algae: Cyanotype Impressions* with handwritten text and cyanotype photographs. It is considered the first book of photographs ever published. Weaving together histories of women, science, and art, *The Bluest of Blues* will inspire young readers to embark on their own journeys of discovery and creativity.

Third World in the First Aug 22 2021 European colonisation has marginalised the 'first peoples' in industrialised countries such as Australia and Canada. In remote regions, still the homes of large Aboriginal, Indian and Inuit populations, this legacy remains strong. Modernisation - the 'boom and bust' model of state and private development - and the partial and biased assistance provided by the state have eroded many communities through their disregard for socio-economic structures and the beliefs which underpin them. *Third World in the First* explores the past, present and future of these peoples, their treatment by the 'West' and the alternative strategies of development which might be available to them.

Adrift in the Arctic Ice Pack - From the History of the First U.S. Grinnell Expedition in Search

of Sir John Franklin Mar 17 2021 In 1845, British Royal Navy officer and Arctic explorer Sir John Franklin (1786-1847) embarked on his third and final expedition into the Canadian Arctic to force the Northwest Passage. After two years with no word, a £20,000 reward was offered to anyone who could find the expedition, leading to many rescue attempts. Two such attempts were undertaken by Elisha Kent Kane (1820-1857), American explorer and United States Navy medical officer. Despite contracting scurvy and suffering greatly during his 1853 attempt, he continued on and went further north than any other explorer had managed. Kane was eventually forced to relinquish the icebound brig "Advance" on May 20, 1855 and spent the next 83 days marching to Upernavik carrying the invalids—losing but one man on the perilous journey. "Adrift in the Arctic Ice Pack" contains Kane's personal account of his courageous but ill-fated rescue mission, detailing the perilous conditions they had to endure and how they were able to survive against all odds in the Arctic wasteland. Highly recommended for those with an interest in Arctic exploration and history in general. Read & Co. History is republishing this classic memoir now in a brand new edition complete with an introductory biography by John Knox Laughton.
