Securing Citrix XenApp Server in the Enterprise Apr 29 2022 Citrix Presentation Server allows remote users to work off a network

server as if they weren't remote. That means: Incredibly fast access to data and applications for users, no third party VPN connection, and no latency issues. All of these features make Citrix Presentation Server a great tool for increasing access and productivity for remote users. Unfortunately, these same features make Citrix just as dangerous to the network it's running on. By definition, Citrix is granting remote users direct access to corporate servers?..achieving this type of access is also the holy grail for malicious hackers. To compromise a server running Citrix Presentation Server, a hacker need not penetrate a heavily defended corporate or government server. They can simply compromise the far more vulnerable laptop, remote office, or home office of any computer connected to that server by Citrix Presentation Server. All of this makes Citrix Presentation Server a high-value target for malicious hackers. And although it is a high-value target, Citrix Presentation Servers and remote workstations are often relatively easily hacked, because they are often times deployed by overworked system administrators who haven't even configured the most basic security features offered by Citrix. "The problem, in other words, isn't a lack of options for securing Citrix instances; the problem is that administrators aren't using them." (eWeek, October 2007). In support of this assertion Security researcher Petko D. Petkov, aka "pdp", said in an Oct. 4 posting that his recent testing of Citrix gateways led him to "tons" of "wide-open" Citrix instances, including 10 on government domains and four on military domains. * The most comprehensive book published for system administrators providing step-by-step instructions for a secure Citrix Presentation Server. * Special chapter by Security researcher Petko D. Petkov'aka "pdp detailing tactics used by malicious hackers to compromise Citrix Presentation Servers. * Companion Web site contains custom Citrix scripts for administrators to install, configure, and troubleshoot Citrix Presentation Server.

Technische und wirtschaftliche Betrachtung von Clientvirtualisierung: Citrix (XenApp/XenDesktop) vs. Vmware (View) Dec 14 2020 Durch den Trend zu mobilen Endgeräten wie Tablet PCs, iPads und Smartphones entstehen Veränderungen und gleichzeitig erhebliche Herausforderungen in den IT-Abteilungen. Die Endbenutzer und Kunden wollen ihre E-Mails sofort aufs Handy bekommen, wollen ihre Applikationen auch unterwegs nutzen können und von jedem Ort der Welt Zugriff auf ihre Daten haben. Dabei sind die Geräte oft nur schwer bis gar nicht zu managen. Auf der anderen Seite bieten Lösungen zur Virtualisierung wie Citrix oder VMWare einen Mehrwert, der die Mitarbeiter effektiver arbeiten lässt und Einsparungen im Clientdeployment bietet. Diese Faktoren wurden in der vorliegenden Arbeit durch eine Ist-Analyse in einer bestehenden Umgebung gesammelt und zusammen mit aktuellen Problemen wurde daraus ein Anforderungskatalog an eine zukünftige Lösung erstellt. Dieser wurde bewertet und die Produkte daraufhin untersucht. Dabei wurde eine Empfehlung abgeleitet, die sowohl wirtschaftliche, als auch technische Sichtweisen übersichtlich darstellt.
