Evaluating Environment in International Development Aug 18 2021 This book provides novel and in-depth perspectives on evaluating environment and sustainability issues in developing countries. Evaluating Environment in International Development focuses on the approaches and experiences of leading international organizations, not-for-profits, and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision-makers. Moving beyond projects and programmes, it explores normative work on the environment as well as environmental consequences of economic and social development efforts. This new edition reflects on the 2030 Agenda for Sustainable Development and Sustainable Development Goals and considers how they have influenced efforts in a wide range of countries and what the implications are for evaluation. It also explores ways in which Big Data and geospatial approaches might be utilized. Significantly updated throughout to reflect recent developments in climate change research, and on the implications of the 2020 pandemic, this volume will be of great interest to students and scholars of environment studies, development studies, international relations, sustainable development

and evaluation, as well as practitioners in international organizations and development and environmental NGOs.

Fundamentals of Psychodrama Jan 23 2022 This book offers a comprehensive guide to psychodrama, including the underlying philosophy, methodology, theory and applications. Taking readers through the process of staging a psychodrama session, from the contracting phase, exploration and enactment to closure and integration, the book also presents brief short examples to illustrate how to choose the best methodological approach for any context, and describes in detail the various psychodrama techniques and their application in practice, with indications, contraindications, typical pitfalls and FAQs. The book demonstrates that psychodrama is not merely a collection of methods and techniques and that the potential of psychodrama cannot be fully utilized without an in-depth knowledge of its conceptual foundations. With examples from a range of practices, it shows the broad applicability of psychodrama in therapeutic and non-therapeutic contexts alike, e.g. in educational contexts (school and adult education), social work, organization development, coaching and many other fields. This easy-to-read book uses jargon-free language and will appeal to psychotherapy researchers and practitioners, as well as non-therapeutic professionals like human resource consultants and life coaches. This is a translated and revised edition of the best-selling German book *Psychodrama: Grundlagen* (Springer, 2014, 3rd edition).

Economics of Land Degradation and Improvement – A Global Assessment for Sustainable

Development May 15 2021 This volume deals with land degradation, which is occurring in almost all terrestrial biomes and agro-ecologies, in both low and high income countries and is stretching to about 30% of the total global land area. About three billion people reside in these degraded lands. However, the impact of land degradation is especially severe on livelihoods of the poor who heavily depend on natural resources. The annual global cost of land degradation due to land use and cover change (LUCC) and lower cropland and rangeland productivity is estimated to be about 300 billion USD. Sub-Saharan Africa (SSA) accounts for the largest share (22%) of the total global cost of land degradation. Only about 38% of the cost of land degradation due to LUCC - which accounts for 78% of the US\$300 billion loss – is borne by land users and the remaining share (62%) is borne by consumers of ecosystem services off the farm. The results in this volume indicate that reversing land degradation trends makes both economic sense, and has multiple social and environmental benefits. On average, one US dollar investment into restoration of degraded land returns five US dollars. The findings of the country case studies call for increased investments into the rehabilitation and restoration of degraded lands, including through such institutional and policy measures as strengthening community participation for sustainable land management, enhancing government effectiveness and rule of law, improving access to markets and rural services, and securing land tenure. The assessment in this volume has been conducted at a time when there is an elevated interest in private land investments and when global efforts to achieve sustainable development objectives have intensified. In this regard, the results of this volume can contribute significantly to the ongoing policy debate and efforts to design strategies for achieving sustainable development goals and related efforts to address land

degradation and halt biodiversity loss.

Behavioral Objectives--Evaluation in Nursing Oct 08 2020 No description is available at this time.

The Objectives of United States Economic Assistance Programs Mar 01 2020

Japan and Asia Jun 03 2020 The book is a precious reference book for development economics or the political economy of development in Asia or anywhere else. Unlike other books, first, it deals with all the East Asian countries, including Japan and other Asian countries. Second, it offers some empirical research findings based on surveys conducted by the author's group. Research on developing countries has been limited by individual scholars' observations, particularly about the value-related issues like politics or religions. Thirdly, the book digs into the nation-building problems which are often neglected by economists. It bridges the politics, sociology and economics in East Asian countries and is an important reference book for graduate students. Contents: Introduction: My Research on Asian Development The Present and the Future of Japan and Asia: When Can Asia Play a Leading Role in the World? The Lessons of the Lost Two Decades of the Japanese Economy A Postmortem Diagnosis of Asian Financial Crisis Who are Responsible for the World Financial Crisis in 2008? Policies for Aging Population with Declining Fertility Rate The Stages of Economic Development and Nation Building: Economic Development and Nation Building in Stages Regional Development Policy Development Policies in Stages Decentralization Policies in Asian Development Empirical Survey Studies of Southeast Asia: The Choice of Appropriate Technologies I — The Influence of Socio-Economic Factors and Government Policies The Choice of Appropriate Technologies II — Survey Findings in

Indonesia, Thailand, and the Philippines
The Socio-Economic Behavior of Peasants in Central Java and Central Thailand
Japanese-style Management in Asia — Introduction
Japanese-style Management in Singapore
Japanese-style Management in Indonesia
Japanese-style Management in China — A Summary Report
Political and Cultural Problems of Asian Nations:
Nationalism and Asian Political Leaders
Is the Clash of Civilizations or Nations?
Readership: Undergraduates, graduates and researchers who are interested in development economics or political economy of development in Asia.
Key Features:
It is a comparative study of Japan and all other East Asian nations
It is based on the author's own empirical survey findings in Southeast Asian countries
It deals with the nation-building issues along with economic development and offers new viewpoints of the author
Keywords: Japanese; Asian Development

Developing Objectives for Healthy People 2010 Jun 27 2022

Behavioral Objectives in Curriculum Development Nov 01 2022

Public Health Nursing - Revised Reprint Apr 13 2021
This Revised Reprint of our 8th edition, the "gold standard" in community health nursing, *Public Health Nursing: Population-Centered Health Care in the Community*, has been updated with a new Quality and Safety Education in Nursing (QSEN) appendix that features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. As with the previous version, this text provides comprehensive and up-to-date content to keep you at the forefront of the ever-changing community health climate and prepare you for an effective nursing career. In addition to concepts and interventions for individuals, families, and communities, this text also incorporates real-life applications of the public nurse's role, Healthy

People 2020 initiatives, new chapters on forensics and genomics, plus timely coverage of disaster management and important client populations such as pregnant teens, the homeless, immigrants, and more. Evidence-Based Practice boxes illustrate how the latest research findings apply to public/community health nursing. Separate chapters on disease outbreak investigation and disaster management describe the nurse's role in surveilling public health and managing these types of threats to public health. Separate unit on the public/community health nurse's role describes the different functions of the public/community health nurse within the community. Levels of Prevention boxes show how community/public health nurses deliver health care interventions at the primary, secondary, and tertiary levels of prevention. What Do You Think?, Did You Know?, and How To? boxes use practical examples and critical thinking exercises to illustrate chapter content. The Cutting Edge highlights significant issues and new approaches to community-oriented nursing practice. Practice Application provides case studies with critical thinking questions. Separate chapters on community health initiatives thoroughly describe different approaches to promoting health among populations. Appendixes offer additional resources and key information, such as screening and assessment tools and clinical practice guidelines. NEW! Quality and Safety Education in Nursing (QSEN) appendix features examples of incorporating knowledge, skills, and attitudes to improve quality and safety in community/public health nursing practice. NEW! Linking Content to Practice boxes provide real-life applications for chapter content. NEW! Healthy People 2020 feature boxes highlight the goals and objectives for promoting health and wellness over the next decade. NEW! Forensic Nursing in the Community chapter focuses on the unique role of forensic nurses in public health and

safety, interpersonal violence, mass violence, and disasters. NEW! Genomics in Public Health Nursing chapter includes a history of genetics and genomics and their impact on public/community health nursing care.

World Investment Report 2019 Oct 20 2021 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

Future National Space Objectives Nov 28 2019

The global effort to eradicate rinderpest Dec 30 2019 During the past 70 years, concerted efforts by the national veterinary services of affected countries from Senegal to China and Russia

to South Africa--aided by international organizations--have brought the once-dreaded rinderpest virus to the point of extinction. In the near future, we can expect to see a global declaration of freedom from rinderpest, the first time this has been achieved for a livestock disease. The devastation wrought by rinderpest stimulated the founding of veterinary schools in many countries, and provided the basis for the development of the veterinary profession. The legacy of control programs in the past 20 years includes vaccine innovations and the development of new epidemiological and surveillance tools that are based on participatory techniques. Additionally, the benefits derived from eradication are many, ranging from increased confidence in livestock-based agriculture to increased food security, protected rural livelihoods, technically more proficient veterinary services, an opening of trade into lucrative markets in the Middle East, and the safeguarding of Africa's wildlife heritage from a serious threat to its dwindling populations. As for the financial benefits of rinderpest eradication, describing them is constrained because of a general lack of studies on the subject, and the fact that programs covering multiple issues often did not clearly discern the rinderpest problem. This analysis attempts to present lessons learned from the experience gained in eradicating rinderpest, and explores the socioeconomic gains made as a result.

Development of the COBRAS III Performance Objectives for the Brigade and Battalion Staff Exercise May 03 2020 "This research and development effort, called Combined Arms Operations at Brigade Level, Realistically Achieved Through Simulation III (COBRAS III), designed simulation -based, structured training for the staffs of the conventionally-equipped brigade combat team (BCT). The effort included designing a progressive approach to presenting

and utilizing training objectives. The resulting product was a set of "performance objectives" that provides techniques and procedures for command and staff performance. The performance objectives resulted from and support the purpose of the training, which is to facilitate BCT preparation for combat training center rotations and deployment. The performance objective concept was an extension of the task analysis work conducted during the two proceedings projects. -- COBRAS I and COBRAS II."--DTIC.

Agriculture, Rural Development, and Related Agencies Appropriations for 1983: Agricultural programs Dec 10 2020

Design research in software development: Constructing and Linking Research Questions, Objectives, Methods and Outcomes (UUM Press) Feb 21 2022 Design research is grounded on the iterative Triangulation Methodology (ITM), where theoretical, development and empirical research approaches are triangulated to accomplish the design research objectives. Constructing and associating research gaps, questions, objectives, methods and outcomes are imperative in a research. However, not linking all these and choosing the wrong and poorly designed methods are common especially among inexperienced researchers and students. Therefore, researchers should practice strategies in identifying the right methods to collect data or perform experiment that can meet the predefined objectives and determined research problems. This book is aimed at providing some of the likely strategies. It contains personalized strategies and examples that are useful for starting a design research in any field particularly in software and application development. The examples described are real studies that we conducted together with our research team members.

AIDS in Africa and the Caribbean Jan 29 2020 This book offers detailed ethnographic studies from Africa and the Caribbean to explain AIDS in a global and comparative third-world context. The essays move beyond medical or epidemiological models, explaining the epidemic in its economic, social, political, and historical contexts.

Measuring the Performance and Achievement of Social Objectives of Development Finance Institutions Sep 30 2022

Conflicting Objectives in Democracy Promotion Sep 18 2021 The agenda of external actors often includes a number of objectives that do not necessarily and automatically go together. Fostering security and stability in semi-authoritarian regimes collides with policies aimed at the support of processes of democratization prone to conflict and destabilization. Meanwhile, the promotion of national self-determination and political empowerment might lead to forms of democracy, partially incompatible with liberal understandings. These conflicting objectives are often problematized as challenges to the effectiveness of international democracy promotion. This book presents systematic research about their emergence and effects. The contributing authors investigate (post-) conflict societies, developing countries, and authoritarian regimes in Southeast Europe, Latin America, Africa, and Asia. They identify the socio-economic and political conditions in the recipient country, the interaction between international and local actors, and the capacity of international and local actors as relevant for explaining the emergence of conflicting objectives. And they empirically show that faced with conflicting objectives donors either use a 'wait and see'-approach (i.e. not to act to overcome such conflicts), they prioritize security, state-building and development over democracy, or they compromise democracy promotion with other

goals. However, convincing strategies for dealing with such conflicts still need to be devised. This book was published as a special issue of Democratization.

Value-Focused Business Process Engineering : a Systems Approach Nov 20 2021 One of the keys to successful business process engineering is tight alignment of processes with organisational goals and values. Historically, however, it has always been difficult to relate different levels of organizational processes to the strategic and operational objectives of a complex organization with many interrelated and interdependent processes and goals. This lack of integration is especially well recognized within the Human Resource Management (HRM) discipline, where there is a clearly defined need for greater alignment of HRM processes with the overall organizational objectives. Value-Focused Business Process Engineering is a monograph that combines and extends the best on offer in Information Systems and Operations Research/Decision Sciences modelling paradigms to facilitate gains in both business efficiency and business effectiveness.

How To Win Friends And Influence People Apr 25 2022 "How to Win Friends and Influence People" is one of the first best-selling self-help books ever published. It can enable you to make friends quickly and easily, help you to win people to your way of thinking, increase your influence, your prestige, your ability to get things done, as well as enable you to win new clients, new customers. **_x000D_ Twelve Things This Book Will Do For You: _x000D_ Get you out of a mental rut, give you new thoughts, new visions, new ambitions. _x000D_ Enable you to make friends quickly and easily. _x000D_ Increase your popularity. _x000D_ Help you to win people to your way of thinking. _x000D_ Increase your influence, your prestige, your ability to get things**

done. Enable you to win new clients, new customers. Increase your earning power. Make you a better salesman, a better executive. Help you to handle complaints, avoid arguments, keep your human contacts smooth and pleasant. Make you a better speaker, a more entertaining conversationalist. Make the principles of psychology easy for you to apply in your daily contacts. Help you to arouse enthusiasm among your associates. Dale Carnegie (1888-1955) was an American writer and lecturer and the developer of famous courses in self-improvement, salesmanship, corporate training, public speaking, and interpersonal skills. Born into poverty on a farm in Missouri, he was the author of *How to Win Friends and Influence People* (1936), a massive bestseller that remains popular today.

Agricultural productivity in Africa Sep 06 2020 *Agricultural Productivity in Africa: Trends, Patterns, and Determinants* presents updated and new analyses of land, labor, and total productivity trends in African agriculture. It brings together analyses of a unique mix of data sources and evaluations of public policies and development projects to recommend ways to increase agricultural productivity in Africa. This book is timely in light of the recent and ongoing growth recovery across the continent. The good news is that agricultural productivity in Africa increased at a moderate rate between 1961 and 2012, although there are variations in the rate of growth in land, labor, and total factor productivities depending on country and region. Differences in input use and capital intensities in agricultural production in the various farming systems and agricultural productivity zones also affect advancements in technology. One conclusion based on the book's research findings derives from the substantial spatial variation in

agricultural productivity. For areas with similar agricultural productivity growth trends and factors, what works well in one area can be used as the basis for formulating best-fit, location-specific agricultural policies, investments, and interventions in similar areas. This finding along with others will be of particular interest to policy- and decisionmakers.

Measure What Matters Jul 29 2022 #1 New York Times Bestseller Legendary venture capitalist John Doerr reveals how the goal-setting system of Objectives and Key Results (OKRs) has helped tech giants from Intel to Google achieve explosive growth—and how it can help any organization thrive. In the fall of 1999, John Doerr met with the founders of a start-up whom he'd just given \$12.5 million, the biggest investment of his career. Larry Page and Sergey Brin had amazing technology, entrepreneurial energy, and sky-high ambitions, but no real business plan. For Google to change the world (or even to survive), Page and Brin had to learn how to make tough choices on priorities while keeping their team on track. They'd have to know when to pull the plug on losing propositions, to fail fast. And they needed timely, relevant data to track their progress—to measure what mattered. Doerr taught them about a proven approach to operating excellence: Objectives and Key Results. He had first discovered OKRs in the 1970s as an engineer at Intel, where the legendary Andy Grove ("the greatest manager of his or any era") drove the best-run company Doerr had ever seen. Later, as a venture capitalist, Doerr shared Grove's brainchild with more than fifty companies. Wherever the process was faithfully practiced, it worked. In this goal-setting system, objectives define what we seek to achieve; key results are how those top-priority goals will be attained with specific, measurable actions within a set time frame. Everyone's goals, from entry level to CEO, are transparent to the entire

organization. The benefits are profound. OKRs surface an organization's most important work. They focus effort and foster coordination. They keep employees on track. They link objectives across silos to unify and strengthen the entire company. Along the way, OKRs enhance workplace satisfaction and boost retention. In *Measure What Matters*, Doerr shares a broad range of first-person, behind-the-scenes case studies, with narrators including Bono and Bill Gates, to demonstrate the focus, agility, and explosive growth that OKRs have spurred at so many great organizations. This book will help a new generation of leaders capture the same magic.

Future National Space Objectives, Staff Study for the Subcommittee on NASA Oversight of the ... Serial O. Aug 25 2019

Beyond Learning Objectives Mar 25 2022 A learning objective is a statement that describes expected outcomes of a learning event. A seemingly simple concept, it is extremely important in the process of developing effective learning programs. This book links learning objectives to program return on investment (ROI).

Developing Objectives for Healthy People 2010 May 27 2022 For two decades, the U.S. Public Health Service has used health promotion & disease prevention objectives to improve the health of the American people. This guide serves as a resource in reviewing & modifying year 2000 objectives, as well as developing new objectives, for use by private & voluntary org's.; public health, mental health, substance abuse, & environmental agencies; Fed. gov't. agencies; & individuals interested in improving public health. Organized under the broad approaches of health promotion, health protection, & preventive services, the more than 300 national objectives are organized into 22 priority areas.

Healthy People 2010 Objectives Jul 05 2020

Multiple Criteria Problem Solving Mar 13 2021 The objective of this conference was to foster a healthy exchange of ideas and experience in the domain of multiple criteria problem solving. This conference was an outgrowth of an earlier conference I organized with Herve Thiriez at CESA, Jouy-en-Josas, France in 1975 during my stay at the European Institute in Brussels. When I re joined the State University of New York at Buffalo that year, I began to search for potential sponsors for this conference. Approximately one year later when the prospects began to look promising, I contacted several individuals to act as an informal coordinating committee for the conference. I wanted to avoid biasing the conference completely to my way of thinking! The members of this committee were Jim Dyer, Peter Fishburn, Ralph Kee. ney, Bernard Roy (Universite de Paris IX Dauphine who was unable to participate in the conference), and Milan Zeleny. Though the committee did not meet, per se, their inputs regarding format, possible participants, number of participants, length of the conference, and so on were of great value to me in planning and organizing the conference. I wish to acknowledge the contributions of this group. We were most fortunate in obtaining the financial support of the European Institute for Advanced Studies in Management, Brussels (one of the sponsors of the Jouy-en-Josas conference), the Office of Naval Research, and the State University of New York at Buffalo.

Objectives, Competencies and Learning Outcomes Sep 26 2019 This text offers a perspective on issues surrounding student learning by addressing questions of quality and learning effectiveness across a broad and diverse range of courses, student populations and contexts.

Breaking the Boundaries Apr 01 2020 Exploring the complex arena of international planning

for development has until now been uniquely the privilege of influential senior western planners. This book calls into question many of their hallowed principles and much of the conventional wisdom still evident in the halls of academe. At a time of increasing enrollment of foreign students in North American planning programs, the emergence of a new voice has coincided with a growing skepticism, worldwide, about old notions of planning and development in poorer and ex-colonial countries. Now there is a need for brave innovations to reshape our understanding of the global crisis and the potential for progressive and democratic local solutions in both rich and poor nations alike. This new voice is given expression by academics and professionals from Third World nations who received their planning education in the west and who now hold posts in major western planning schools. *Breaking the Boundaries* presents their views, and those of concerned colleagues, about the need for a radically changed curriculum based on a comparative, one-world approach to planning education. Their personal experiences as young expatriate scholars, and later as teachers of both Third World and First World students in western planning schools are seen as crucial to this need for change. Through candid reflections and perceptive critiques of their own field- the spatial, environmental, social, design and communications disciplines - the contributors explore crucial issues in development planning from theoretical and professional practice perspectives.

OECD Rural Policy Reviews Linking Indigenous Communities with Regional Development in Canada Oct 27 2019 Canada's Constitution Act (1982) recognises three Indigenous groups: Indians (now referred to as First Nations), Inuit, and Métis. Indigenous peoples make a vital contribution to the culture, heritage and economic development of Canada. Despite

improvements in Indigenous well-being in recent decades, significant gaps remain with the non-Indigenous population. This study focuses on four priority issues to maximise the potential of Indigenous economies in Canada.

The Northeastern Area's Objectives and Beliefs Responses Regarding Forests and Grasslands

Dec 22 2021 The USDA Forest Service revises its Strategic Plan according to the 1993 Government Performance and Results Act (Public Law 103-62). The goals and objectives included in the Strategic Plan are developed from natural resource trend data (Forest and Rangeland Renewable Resources Planning Act) and public input such as the results from this survey. The purpose of this report is to present results from the second version of this survey (RMRS-GTR-95). A random sample of the American public was asked about their objectives for the management of public lands and beliefs about the role the USDA Forest Service should play in fulfilling those objectives. Major findings include, but are not limited to: (a) The public sees the protection of ecosystems and habitats as an important objective and role for the agency; (b) There is a lack of support for developing new paved roads; (c) Managing motorized recreation is a high priority objective; (d) There is support for allowing diverse uses; (e) On average, the public is neutral with respect to expanding energy and mineral production, timber production, and livestock grazing; (f) Reducing the spread of invasive species is supported; and (g) Using

management tools to reduce wildfires is an important objective and an appropriate role for the agency.

Bottom-Line Organization Development Nov 08 2020 Organization development practitioners have, for over half a century, engaged with organizations to help them grow and thrive. The artful application of Organization Development (OD) has helped business leaders articulate vision, rethink business processes, create more fluid organization structures and better utilize people's talents. While business leaders and OD practitioners intuitively believe that OD provides valuable results, rigorous measurement of the value delivered has long eluded many OD practitioners. 'Bottom-Line Organization Development' provides powerful tools to capture and measure the financial return on investment (ROI) of OD projects to the business. Given the increasing competition for budget and resources within organizations and the requirements of demonstrating tangible results, the need for such OD measurement tools is very high. But in addition to proving the value of OD projects, integrating evaluation into the change management process itself can actually increase the value of the change initiative because it opens up new ways of capturing and increasing the value of change initiatives. In other words, there is an ROI to ROI. Merrill Anderson calls this new way of approaching OD "strategic change valuation." The book explains the five steps in the OD value process - diagnosis, design, deployment, evaluation and reflection. In addition, three case studies take readers through the process of applying bottom-line OD to three types of popular strategic change initiatives: executive coaching, organization capability, and knowledge management. Readers will gain a holistic perspective of how to make the seemingly intangible benefits of these initiatives tangible.

Strategic Planning for Regional Development in the UK Jan 11 2021 With contributions from leading academics and practitioners, *Strategic Planning for Regional Development in the UK* is the most up-to-date treatment of a fast-changing subject. The book discusses: The evolution of regional planning in the UK and the strategic thinking involved The spatial implications of regional economic development policies The methods and techniques needed for the implementation of strategic planning for regional development How strategic planning for regional development is currently put into practice in three UK regions with different priorities. *Strategic Planning for Regional Development in the UK* is essential reading for students and academics working within strategic and regional planning and provides policy makers and practitioners with a comprehensive and thought provoking introduction to this critically important emerging field.
