*Assessment and Learning in the Primary School* Mar 16 2021 This is an innovative yet practical resource book for teachers, focusing on the classroom and covering vital skills for primary and secondary teachers. The book is strongly influenced by the findings of numerous research projects during which hundreds of teachers were observed at work. This book addresses both formal and informal ways of assessing children's work and progress. Pupils' learning is often neglected in the debate, so this book puts what children actually learn right at its centre. Divided into six units, Ted Wragg addresses important topics such as: \* principles and purposes of assessment \* written, oral and practical evaluation \* self-assessment the 'whole school' approach \* staff development and appraisal. The inclusion of practical activities, discussion topics, photographs, cartoons and case examples makes this a very user-friendly book for both trainee and experienced teachers in primary schools.

*More Trouble with Maths* Dec 01 2019 *More Trouble with Maths* acknowledges that there are many reasons why children and adults are unable to function mathematically. Difficulties include problems with rote learning basic facts and procedures, debilitating anxiety, poor working and short-term memories and mathematics vocabulary. Central to this new edition is a range of standardised tests and diagnostic activities, including a 15 minute test of basic mathematics, a thinking style test, tests of basic fact retrieval and maths anxiety. Guiding the reader in the interpretation of tests, this new edition shows how identifying the barriers to learning is the first step in a programme of intervention. Written in an engaging and user-friendly style, Steve Chinn draws on his extensive experience and expertise to: show how to consider and appraise the many factors relating to mathematical learning difficulties explain how these factors can be investigated explore their impact on learning mathematics. Emphasising the need for a clinical approach when assessing individuals, this book shows how diagnosis and assessment can become integrated into everyday teaching. This highly practical and relevant resource is a crucial resource for anyone who wants to accurately and effectively identify the depth and nature of mathematical learning difficulties and dyscalculia.

*Primary Mathematics Audit and Test* Nov 04 2022 If you are a primary trainee, you must demonstrate a knowledge of mathematics to be recommended for QTS. This popular, widely recommended text helps you audit your knowledge of mathematics and understand what learning you need to pass your course. A rigorous test helps you identify your strengths and weaknesses and can be revisited at key stages in your course as a tool to monitor and evaluate progress. The fourth edition has been updated in line with the new National Curriculum, includes more information on expanding and developing your knowledge of mathematics and is linked to the newest Teachers' Standards.

*Race Relations in the Primary School* May 18 2021 Originally published in 1992. This book presents research carried out by the author in four inner-city primary schools. It documents the experiences of black and Asian children, particularly in interaction with their white peers, and with their teachers, from both observation and interviews with parents, teachers and the children. It presents cases both inside and outside the classroom. The children's academic progress is also examined, and the book considers the link between home and school. The concluding chapter is concerned with measures for promoting 'good practice' in the primary school context.

*Ten Minute Maths Assessments Ages 5-6* May 06 2020 *Ten Minute Maths Assessments* closely matches the Primary framework and also ties in extremely well with the Williams interim review which states 'A renewed and sharper focus on the use of mental mathematics would be beneficial, and would particularly help under-attaining groups of children'. The tests are quick and easy to administer and would provide a 'snap shot' of where each pupil is - perfect for on-going periodic assessment introduced as part of APP. Andrew has analysed the Primary Mathematics framework carefully and worked out the number of learning objectives that can be successfully tested in each year group. By taking the framework and breaking it down into small 'steps for learning' each test focuses on what the pupils are actually learning in class. The teacher can then give the test to a group of pupils, who have been working on one of these steps, to monitor their progress. The teacher records the results on the assessment grid and, over a period of time, builds a clear picture of each pupil's NC level. This approach is very much the thrust of the latest developments in assessment: *Assessment for Learning, Assessing Pupils' Progress, etc.*

*Maths, Age 10-11* Sep 09 2020 When it comes to getting the best results, practice really does make perfect! Matched to the requirements of the National Curriculum, this math practice workbook targets every topic in Year 6 and contains practice opportunities to help improve performance in tests and assessments at Key Stage 2. Based on new research that proves repeated practice is more effective than repeated study, practice workbooks are guaranteed to help improve performance in tests and assessments. Included in this book are questions for every topic organized into three levels of increasing difficulty, progress tests throughout the book

for ongoing assessment, a section where children can record their results and track their own progress, and a pull-out answer section.

Youth and Skills Oct 30 2019 "Many young people around the world --- especially the disadvantaged --- are leaving school without the skills they need to thrive in society and find decent jobs. As well as thwarting young people's hopes, these education failures are jeopardizing equitable economic growth and social cohesion, and preventing many countries from reaping the potential benefits of their growing youth populations. The 2012 Education for All Global Monitoring Report examines how skills development programmes can be improved to boost young people's opportunities for decent jobs and better lives."--Publisher's description
