1600.io SAT Math Volume I Mar 01 2020 [NOTE: This is Volume I of a two-volume set; each volume must be purchased separately.] Setting the new standard: The SAT Math book that you've been waiting for. The game-changing 1600.io "Orange Book" establishes a new category of premium SAT instructional materials. This groundbreaking text is not a collection of "tricks" or "hacks" for getting around the SAT's function of assessing students' skills. Instead, it meets the test on its own terms by providing comprehensive, clear, and patient education in every mathematical concept that can appear on the exam according to the officially published specifications for the test. The renowned SAT preparation team at 1600.io used their extensive experience based on the tens of thousands of students who have passed through our virtual doors to craft this two-volume set (of which this is Volume I) with a fanatical attention to every detail, no matter how small, and we poured into it everything we've learned about how to most effectively help each student acquire the firm, confident grasp of math they need to become a confident master of the material - and, therefore, of the math sections of the SAT. Every SAT math topic, clearly explained Our team spent two years analyzing every math problem on every released test to ensure that we provided engaging, cogent, and thorough explanations for all of the needed concepts. We've got problems... ..and our problems are going to be your problems. More than 16 tests' worth of meticulously constructed SAT-style example and practice problems with hundreds of fully-worked-out solutions. A 1600.io invention: SkillDrills(TM) Many problem-solving techniques are composed of building block skills, so rather than forcing students to make the leap right from instruction to tackling test problems, we provide the intermediate step of these innovative mini-problem sets that build essential skills - and students' confidence. Instant topic lookup for released SAT problems Every one of the 1,276 math problems on the released SATs has been cross-referenced with the section of this pair of books where the primary math skill is fully explained, so students are supported for the entire learning cycle. Each chapter in each volume in the series contains chapters which have section problems, chapter problems, SkillDrills, answer keys, and lists of related real problems from released tests. Volume I (this book) contains the following chapters: Foundations Linear Relationships Slope-Intercept Form Standard Form/Parallel and Perpendicular Lines Systems of Linear Equations Linear Inequalities and Absolute Value Exponents and Radicals/Roots Introduction to Polynomials Solving Quadratic Equations> Extraneous Solutions and Dividing Polynomials The Graphs of Quadratic Equations and Polynomials Number of Zeros/Imaginary and Complex Numbers Volume II (available separately) contains the following chapters: Ratios, Probability, and Proportions Percentages Exponential Relationships Scatterplots and Line Graphs Functions Statistics Unit

Conversions Angles, Triangles, and Trigonometry Circles and Volume Wormholes Note that this is a two-volume set, with the topics divided between the volumes, so students should purchase both volumes to have the complete text.

Guinness World Records: Science and Stuff Jun 23 2019 Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science and Stuff celebrates the simple joy in finding things out. What can cats teach us about the laws of physics? Why was cabbage banned on the International Space Station? (Can you fart in space?) And would a penny dropped from the Empire State Building really kill someone? (Short answer: No!) But it's not all facts and stats. The feature chapter just for Makers, introduced by our very own mad professor Burnaby Q. Orbox, challenges you to attempt record-breaking science experiments at home, from the fastest Mentos & Soda rocket car to the most slime thrown and caught in a minute! Join us as we rise from the deepest depths of the ocean, where weird glowing fish hunt in the darkness, to the mountaintop observatories where scientists unravel the secrets of the universe.
