The First 20 Hours Jun 26 2019 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In The First 20 Hours, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, The First 20 Hours will help you pick up the basics of any skill in record time . . . and have more fun along the way.

Families who are part of the homeschool movement will find this book especially useful. Using the same music and fundamentals included in the original edition, an easy and user-friendly Parent Guide precedes each student page to aid with teaching the music to the child. The guide suggests steps for introducing the concept or page to the student, follow-up practice suggestions, and suggestions for reviewing the material in subsequent lessons. The enclosed CD contains a recording of every piece in the book. Uke Can Do It 2! May 06 2020 This groundbreaking work, specially designed for the music classroom, combines traditional and popular literature in a method that both teaches the ukulele and develops music literacy. Assuming no prior knowledge, the leveled content allows students to track their progress and teachers to reward benchmark achievements. Many popular pieces are written in the same key as their common recordings, allowing students to play along if they wish, and no singing parts use notation symbols that have not already been formally introduced. The book teaches students both how to read and write music on the treble staff but also offers opportunities to follow chord charts, improvise, and play by ear. By encouraging the development of these transferrable skills, Uke Can Do It 2 provides a solid foundation for lifelong music-making!
