*The Representation of Science and Scientists on Postage Stamps May 31 2022 "For approaching two centuries, the images on postage stamps have been used to convey messages from the government of the day to the general public. Science has been used to enhance those messages for the past nine decades. In this book, I explore the ways in which science and scientists have been portrayed on stamps and look at the ideas and, in some cases, the propaganda that underpins them."--Page 1.*

*The GH Kaestlin Collection of Imperial Russian and Zemstvo Stamps Mar 05 2020 A quiet philatelist, George H. Kaestlin joined the original Rossika Society in 1935 along with the better known Theo B. Lavroff and K. Szymanowski. Whereas Lavroff contributed significantly to Russian philately as an author and researcher and Szymanowski was an avid collector, Kaestlin collected privately. Born in Moscow, circa 1893, Kaestlin arrived in England in 1939. After World War II, when the original Rossika dissolved, he did not join the newly reconstituted Rossika Society of the United States. He never wrote for any philatelic magazine, never joined the London-based British Society of Russian Philately, and never showed his material at any exhibition. Thus he managed to elude notice in the literature of the times and receded into obscurity. Kaestlin's exceedingly remarkable contribution, however, is found in the quality and scope of his collection and in the preservation of the treasures he acquired (many from the legendary Fabergé collection). Kaestlin's attention to detail and fastidious collecting habits are evident in the layout and handwriting in his albums. His collection, donated to the Smithsonian Institution in 1984 by his niece Vera Madeleine Kaestlin-Bock, includes more than 1,250 album pages on which he organized more than 14,000 Imperial Russian and zemstvo stamps. The quality of the stamps is outstanding. With the publication of this book, Kaestlin can finally*

take his place among the greats of Russian philately. The G.H. Kaestlin Collection of Imperial Russian and Zemstvo Stamps is one of the greatest museum collections outside of Russia.

**Cosa Oct 12 2020** This long-awaited volume presents the work of Elizabeth Lyding Will on the important group of transport amphoras found at Cosa. This town has been widely recognized as a prototypical colony of the later Roman Republic and a source for trade with Gaul and Spain, so this publication of its finds has important implications for archaeologists and historians of the ancient world. Will's initial work was on Latin amphora-stamps in the eastern Mediterranean, and through the 1960s and 1970s she developed an amphora typology based on materials found in the region and at Cosa. What has not been appreciated is that this typology was not limited to stamped Republican amphoras but also included unstamped vessels, such as imperial Spanish, African, and eastern amphoras dating as late as the fifth century CE. This book shows that Will was far ahead of her time in documenting the Mediterranean trade in commodities carried in amphoras: her work not only provides a record of the amphoras found on the town-site of Cosa, but also includes a comparison between the finds from the port and the town. At the time of Will's death, her manuscript consisted of a typed catalogue of the amphora stamps from Cosa and an equal number of unstamped vessels, but was missing important elements. On the basis of extensive notes and photographs, Kathleen Warner Slane has reviewed and updated the manuscript, adding type descriptions and footnotes to materials that have appeared since Will's death as well as a framing introduction and conclusions. Appendices highlight an Augustan amphora dump on the Arx and add a catalogue of the Greek amphora stamps found at Cosa. Cosa: The Roman and Greek Amphoras will be of interest to scholars and students of Rome and its system of colonies, and also to those interested in Greek and Roman archaeology and trade in the ancient world.

**Iridescent Kuwait Jul 21 2021** Die Erdöl-Moderne ist ein lokales Phänomen der Geschichte Kuwaits, aber auch ein globales Ereignis und massgebliche Ursache des Klimawandels. Die Studie untersucht die Rolle von Erdöl in der visuellen Kultur Kuwaits im Kontext von Ideologien wie Modernisierung und politischer Repräsentation. Der Begriff des Irisierenden, eines in Regenbogenfarben schillernden Farbenspiels, dient als analytisch-ästhetisches Konzept, um den umstrittenen Beitrag von Erdöl in der Moderne zu diskutieren: sowohl Wohlstandsversprechen wie auch destruktive Kraft in soziokultureller und ökologischer Hinsicht. Das Buch versammelt eine Fülle historischen Bildmaterials, darunter Luft- und Farbfotografien, Briefmarken, Stadtpläne und Architekturdarstellungen, um unter Berücksichtigung von zeitgenössischer Kunst aus der Golfregion das visuelle Erbe der Erdöl- Moderne kritisch zu hinterfragen.

**Branding the Nation, the Place, the Product** May 19 2021 Branding is a profoundly geographical type of commodification process. Many things become commodities that are compared and valued on markets around the globe. Places such as cities or regions, countries and nations attempt to acquire visibility through branding. Geographical imaginations are evoked to brand goods and places as commodities in order to show or create connections and add value. Yet, not all that is branded was originally intended and created for markets. This volume aims to broaden current understanding of branding through a series of contributions from geography, history, political studies, cultural, and media studies, offering insight into how ordinary places, objects and practices become commodities through branding. In so doing, the contributions also show how nation, place and product as targets of branding can be seen as intertwined. To discuss these forms of branding, book chapters refer to states, cities, holiday destinations, food malls, movies, dances, post stamps and other items that serve as brands and/or are branded. The book will be of interest to students and scholars in geography, sociology, history, cultural studies and business studies who would like to gain an understanding of the intricate and surprising ways in which things, places, and cultural practices become brands.

**Stamps, Nationalism and Political Transition** Jul 01 2022 This book explores how states in political transition use stamps to promote a new visual nationalism. Stamps as products of the state and provide small pieces of information about a state's heritage, culture, economies and place in the world. These depictions change over time, reflecting political and cultural changes and developments. The volume explores the transition times in more than a dozen countries from Africa, Latin America, Asia and Europe. Specifically addressed are the stamp topics, issues and themes in the years before and after such major changes occurred, for example, from a European colony to political independence or from a dictatorship to democracy. The authors compare the personalities, histories, and cultural representations "before" the transition period and how the state used the "after" event to define or redefine its place on the world political map. The final three chapters consider international themes on many stamp issues, one being stamps with Disney cartoon characters, another on "themeless" Forever stamps, and the third on states celebrating women and their accomplishments. This volume has wide interdisciplinary relevance and should prove of particular interest to those studying geopolitics, political transition, visual nationalism, soft power and visual representations of decolonializing.
