[The H Factor of Personality](#) Nov 20 2021 The “H” in the H factor stands for “Honesty-Humility,” one of the six basic dimensions of the human personality. People who have high levels of H are sincere and modest; people who have low levels are deceitful and pretentious. It isn’t intuitively obvious that traits of honesty and humility go hand in hand, and until very recently the H factor hadn’t been recognized as a basic dimension of personality. But scientific evidence shows that traits of honesty and humility form a unified group of personality traits, separate from those of the other five groups identified several decades ago. This book, written by the discoverers of the H factor, explores the scientific findings that show the importance of this personality dimension in various aspects of people’s lives: their approaches to money, power, and sex; their inclination to commit crimes or obey the law; their attitudes about society, politics, and religion; and their choice of friends and spouse. Finally, the book provides ways of identifying people who are low in the H factor, as well as advice on how to raise one’s own level of H.

Me, Myself, and Us Oct 20 2021 In the past few decades, personality psychology has made considerable progress in raising new questions about human nature—and providing some provocative answers. New scientific research has transformed old ideas about personality based on the theories of Freud, Jung, and the humanistic psychologies of the nineteen sixties, which gave rise to the simplistic categorizations of the Meyer-Briggs Inventory and the 'enneagram'. But the general public still knows little about the new science and what it reveals about who we are. In this book, Brian Little, one of the psychologists who helped re-shape the field, provides the first in-depth exploration of the new personality science and its provocative findings for general readers. The book explores questions that are rooted in the origins of human consciousness but are as commonplace as yesterday's breakfast conversation. Are our first impressions of other people's personalities usually fallacious? Are creative individuals essentially maladjusted? Are our personality traits, as William James put it "set like plaster" by the age of thirty? Is a belief that we are in control of our lives an unmitigated good? Do our singular personalities comprise one unified self or a confederacy of selves, and if the latter, which of our mini-me-s do we offer up in marriage or mergers? Are some individuals genetically hard-wired for happiness? Which is the more viable path toward human flourishing, the pursuit of happiness or the happiness of pursuit? Little provides a resource for answering such questions, and a framework through which readers can explore the personal implications of the new science of personality. Questionnaires and interactive assessments throughout the book facilitate self-exploration, and clarify some of the stranger aspects of our own conduct and that of others. Brian Little helps us see ourselves, and other selves, as somewhat less perplexing and definitely more intriguing. This is not a self-help book, but students at Harvard who took the lecture course on which it is based claim that it changed their lives.

Coverage of current research is up-to-date and extensive. Longitudinal naturalistic studies, which have shown surprising patterns of improvement in patients with selected personality disorders, as well as new and more rigorous treatment studies, have yielded critical findings in recent years, all of which are thoroughly addressed. Dozens of vivid and detailed case examples are included to illustrate diagnostic and treatment concepts. The editors have selected a roster of contributors second to none, and the text has been scrupulously edited for consistency of language, tone, and coverage. [I Don't Want to Die Unknown](#) May 03 2020 Dan Moyane was 10 years old when he lay on his back on a patch of grass at his parents' home in White City Jabavu, Soweto, looking at the moon and thinking, 'I don't want to die unknown.' The year was 1969, and Neil Armstrong and his team had recently achieved immortality by completing the first moon landing. It was the knowledge that the astronauts would be remembered as long as the world turned that made Dan realise that he, too, would like to be remembered by people outside of his immediate community, just as he would like to find out more about what lay beyond his horizon. Dan's insatiable curiosity and love of learning have ensured that his name has, indeed, become known throughout South Africa. This is the story of how he achieved his goal – from his days as a student at the apex of South Africa's political turmoil, to his years in exile in Mozambique and his first job in media, and the trajectory of a career that would see him become one of South Africa's most highly regarded and influential broadcasters. It is a career that led Dan to interview prominent leaders in Mozambique and South Africa and become acquainted with the likes of Nelson Mandela and Graça Machel, and saw him cover the country's birth into democracy, and help shape South Africans' understanding of the changed world around them. I Don't Want to Die Unknown delves into these experiences, giving a glimpse into the inquisitiveness and desire to know more, do more and be more that has driven Dan Moyane. It offers a rare insight into the man behind the microphone – his ambitions, trials, and motivations. Part memoir, part legacy, this book bears testimony to the fact that far from dying unknown, Dan is one of South Africa's most important, high profile media players and his story provides the framework for his next significant question: How best to use his public profile to benefit his countrymen.

[Who Are You, Really?](#) Dec 10 2020 "Traditionally, scientists have emphasized what they call the first and second natures of personality--genes and culture, respectively. But today the field of personality science has moved well beyond the nature vs. nurture debate. In Who Are You, Really? Dr. Brian Little presents a distinctive view of how personality shapes our lives--and why this matters. Little makes the case for a third nature to the human condition--the pursuit of personal projects, idealistic dreams, and creative ventures that shape both people's lives and their personalities. Little uncovers what personality science has been discovering about the role of personal projects, revealing how this new concept can help people better understand themselves and shape their lives"--Provided by publisher.

[Personality Isn't Permanent](#) Jan 11 2021 Psychologist and bestselling author Benjamin Hardy, PhD, debunks the pervasive myths about personality that prevent us from learning—and provides bold strategies for personal transformation In Personality Isn't Permanent, Dr. Benjamin Hardy draws on psychological research to demolish the popular misconception that personality—a person's consistent attitudes and behaviors—is innate and unchanging. Hardy liberates us from the limiting belief that our "true selves" are to be discovered, and shows how we can intentionally create our desired selves and achieve amazing goals instead. He offers practical, science-based advice to for personal-reinvention, including: • Why personality tests such as Myers-Briggs and Enneagram are not only psychologically destructive but are no more scientific than horoscopes • Why you should never be the "former" anything--because defining yourself by your past

successes is just as damaging to growth as being haunted by past failures • How to design your current identity based on your desired future self and make decisions here-and-now through your new identity • How to reframe traumatic and painful experiences into a fresh narrative supporting your future success • How to become confident enough to define your own life's purpose • How to create a network of "empathetic witnesses" who actively encourage you through the highs and lows of extreme growth • How to enhance your subconscious to overcome addictions and limiting patterns • How redesign your environment to pull you toward your future, rather than keep you stuck in the past • How to tap into what psychologists call "pull motivation" by narrowing your focus on a single, definable, and compelling outcome The book includes true stories of intentional self-transformation—such as Vanessa O'Brien, who quit her corporate job and set the Guinness World Record for a woman climbing the highest peak on every continent in the fastest time; Andre Norman, who became a Harvard fellow after serving a fourteen-year prison sentence; Ken Arlen, who instantly quit smoking by changing his identity narrative; and Hardy himself, who transcended his childhood in a broken home, surrounded by issues of addiction and mental illness, to earn his PhD and build a happy family. Filled with strategies for reframing your past and designing your future, *Personality Isn't Permanent* is a guide to breaking free from the past and becoming the person you want to be.

Understanding Selfies Jun 03 2020 In the year 2013, 'selfie' was named word of the year by Oxford Dictionaries in recognition of dramatic changes in frequency, prominence, and register of the term. This drastic increase in selfie-taking was spurred by two factors. The first was the advent of smartphones equipped with front cameras and preview screens that made it easy to compose a photographic self-portrait by a process of deliberately exploring one's image, choosing a pose, and finally taking the picture. The second key change contributing to the rise of the selfie age was the increasing availability of internet connections. It is estimated that about 50% of the world population has access to the internet today (2018; <https://www.internetworldstats.com>). At the end of the past century, this percentage was a mere 1%. The growth of the internet infrastructure simultaneously spurred the development of social network applications such as Facebook, Twitter, Snapchat, and Instagram, providing accessible media for sharing photographs including photographic self-portraits. However, despite their tremendous reach and popularity, selfies have so far received relatively little attention by the scientific community, especially within psychology. Thus, we proposed a *Frontiers in Psychology Research Topic* to expand empirical and theoretical work on the massively popular, yet scientifically unexplored, phenomenon of the selfie. The articles published in this eBook offer a multifaceted insight into current scholarly work on this topic.

Get Me Out of Here Jul 25 2019 With astonishing honesty, this memoir reveals what mental illness looks and feels like from the inside, and how healing from borderline personality disorder is possible through intensive therapy and the support of loved ones. With astonishing honesty, this memoir, *Get Me Out of Here*, reveals what mental illness looks and feels like from the inside, and how healing from borderline personality disorder is possible through intensive therapy and the support of loved ones. A mother, wife, and working professional, Reiland was diagnosed with borderline personality disorder at the age of 29--a diagnosis that finally explained her explosive anger, manipulative behaviors, and self-destructive episodes including bouts of anorexia, substance abuse, and promiscuity. A truly riveting read with a hopeful message. Excerpt: "My hidden secrets were not well-concealed. The psychological profile had been right as had the books on BPD. I was manipulative, desperately clinging and prone to tantrums, explosiveness, and frantic acts of desperation when I did not feel the intimacy connection was strong enough. The tough chick loner act of self-reliance was a complete facade."

Self-Portrait with Boy Apr 01 2020 Longlisted for the Center for Fiction First Novel Prize "Fabulously written, this spellbinding debut novel is a real page-turner. A powerful, brilliantly imagined story" (Library Journal, starred review) about an ambitious young artist whose accidental photograph of a boy falling to his death could jumpstart her career, but devastate her most intimate friendship. Lu Rile is a relentlessly focused young photographer struggling to make ends meet. Working three jobs, responsible for her aging father, and worrying that her crumbling loft apartment is being sold to developers, she is at a point of desperation. One day, in the background of a self-portrait, Lu accidentally captures an image of a boy falling to his death. The photograph turns out to be startlingly gorgeous, the best work of art she's ever made. It's an image that could change her life...if she lets it. But the decision to show the photograph is not easy. The boy is her neighbors' son, and the tragedy brings all the building's residents together. It especially unites Lu with the boy's beautiful grieving mother, Kate. As the two forge an intense bond based on sympathy, loneliness, and budding attraction, Lu feels increasingly unsettled and guilty, torn between equally fierce desires: to advance her career, and to protect a woman she has come to love. Set in early 90s Brooklyn on the brink of gentrification, *Self-Portrait with Boy* is a "sparkling debut" (The New York Times Book Review) about the emotional dues that must be paid on the road to success and a powerful exploration of the complex terrain of female friendship. "The conflict is rich and thorny, raising questions about art and morality, love and betrayal, sacrifice and opportunism, and the chance moments that can define a life...It wrestles with the nature of art, but moves with the speed of a page-turner" (Los Angeles Times).
