The Road to Disunion Mar 29 2022 Far from a monolithic block of diehard slave states, the antebellum South was, in William Freehling's words, "a world so lushly various as to be a storyteller's dream." It was a world where Deep South cotton planters clashed with South Carolina rice growers, as Northern egalitarianism infiltrated border states already bitterly divided on key issues. It was the world of Jefferson Davis, John C. Calhoun, Andrew Jackson, and Thomas Jefferson, and also of Gullah Jack, Nat Turner, and Frederick Douglass. Now, in the first volume of his long awaited, monumental study of the South's road to disunion, historian William Freehling offers a sweeping political and social history of the antebellum South from 1776 to 1854. All the dramatic events leading to secession are here: the Missouri Compromise, the Nullification Controversy, the Gag Rule, the Annexation of Texas, the Compromise of 1850, and the Kansas-Nebraska Act. Vivid accounts of each crisis reveal the surprising extent to which slavery influenced national politics before 1850 and provide important reinterpretations of American republicanism, Jeffersonian states' rights, Jacksonian democracy, and the causes of the American Civil War. Freehling's brilliant historical insights illustrate a work of rich social observation. In the cities of the Antebellum South, in the big house of a typical plantation, we feel anew the tensions between the slaveowner and his family, poor whites and planters, the Old and New Souths, and most powerfully between slave and master. Freehling has evoked the Old South in all its color, cruelty, and diversity. It is a memorable portrait, certain to be a key analysis of this crucial era in American history.

Chesapeake Oysters: The Bay's Foundation and Future Sep 10 2020 Chesapeake oysters are part of the legacy of the area, history on the half-shell. Read of their beginning (foot-long bivalves!) through cultivation today. The eastern oyster, the humble bivalve and delicious treat, are the living bones of the Chesapeake, as well as the ecological and historical lifeblood of the region. When colonists first sailed these impossibly abundant shores, they described massive shoals of foot-long oysters but the bottomless appetite of the Gilded Age and great fleets of skipjacks took their toll. Disease, environmental pressures and overconsumption decimated the population by the end of the twentieth century. While Virginia turned to bottom-leasing, passionate debate continues in Maryland among scientists and oystermen whether aquaculture or wild harvesting is the better way forward. Today, boutique oyster farming in the Bay is sustainably meeting the culinary demand of a new generation of connoisseurs. With careful research and interviews with experts, author Kate Livie presents this dynamic story and a glimpse of what the future may hold.

Bay Point Jun 19 2021 To many commuters driving past Bay Point on nearby Highway 4, it would appear that the community sprang up as a housing development sometime in the very recent past, but its unique history is much more than that. During the frontier days, the area was comprised of ranchers and farmers. The large 19th-century district sprouted smaller neighborhoods at the beginning of the 20th century. Nearby the communities of Clyde, Nichols, and later West Pittsburg, the main town was Bay Point, which changed its name to Port Chicago during the Great Depression. In fact, it wasn't until 1993 that the historic name was restored to part of the original district. Today, Bay Point is a residential and business destination, home to tens of thousands of people, as well as high-profile corporations.

Half Moon Bay Mar 05 2020 First dubbed San Benito and then "Spanishtown," Half Moon Bay is a seaside town with a long and intriguing story. Many know it for its lovely natural surroundings, quaint downtown architecture, and relaxed atmosphere, but not many people know that this town was the first to be established in San Mateo County as a result of 1840s land grants to early Spanish settlers. Isolated on the coast for a time, it became home to Mexican, Chilean, Italian, Portuguese, and other cultures after the 1850s, when roads finally reached over the mountains. During the 20th century, a wide variety of businesses thrived here, as people arrived by road, water, and even railroad. Farms, churches, schools, businesses, and homes sprang up, and the town

modernized, though today's Half Moon Bay looks much like it did 100 years ago.

The Secret of Snow Oct 24 2021 THE INSTANT BESTSELLER! USA TODAY PUBLISHERS WEEKLY INDIE BOOKSELLERS "A beautifully written story about second chances. Fans of women's fiction won't be able to put this down." —Publishers Weekly The forecast is calling for a reluctant homecoming and regrettable decisions with a strong chance of romance... When Sonny Dunes, a SoCal meteorologist whose job is all sunshine and seventy-two-degree days, is replaced by a virtual meteorologist that will never age, gain weight or renegotiate its contract, the only station willing to give the fifty-year-old another shot is the very place Sonny's been avoiding since the day she left for college—her northern Michigan hometown. Sonny grudgingly returns to the long, cold, snowy winters of her childhood...with the added humiliation of moving back in with her mother. Not quite an outsider but no longer a local, Sonny finds her past blindsiding her everywhere: from the high school friends she ghosted, to the former journalism classmate and mortal nemesis who's now her boss, to, most keenly, the death years ago of her younger sister, who loved the snow. To distract herself from the memories she's spent her life trying to outrun, Sonny throws herself headfirst into covering every small-town winter event to woo a new audience, made more bearable by a handsome widower with optimism to spare. But with someone trying to undermine her efforts to rebuild her career, Sonny must make peace with who she used to be and allow her heart to thaw if she's ever going to find a place she can truly call home.

Social and Environmental Impacts of the James Bay Hydroelectric Project Oct 12 2020 Planning and construction of the James Bay Hydroelectric project began in the early 1970s, when the effect of such projects on the physical and social environment was seldom considered. As the project matured, however, its unique and diverse environmental impacts came under intense scrutiny on both sides of the border. The first mega-scale hydro project to be built in the sub-Arctic, capable of generating as much electricity as fifteen nuclear power plants, its impact includes disruption of vast areas in an extremely fragile ecosystem as well as displacement of native peoples and the introduction of dangerous levels of mercury into their food supply. The debate over these complex environmental issues has been further complicated by political issues stemming from the importance of the project to the economic development of Quebec and the sale of at least ten percent of the electricity generated to the United States. The contributors examine core issues of the controversy both in relation to James Bay and to other large hydroelectric projects, such as the Aswan dam in Egypt and the Three Gorges dam in China. Providing insights from an unusual variety of disciplines, the authors offer important considerations that must be taken into account as Quebec assesses additional phases of hydroelectric development of the watershed east of Hudson Bay. Contributors include Raymond B. Coppinger (Hampshire College), Bill Dale Roebuck (Dartmouth Medical School), Will Ryan (Hampshire College), Adrian Tanner (Memorial University), Stanley L. Warner (Hampshire College), Kessler E. Woodward (University of Alaska), and Oran R. Young (Dartmouth College). James F. Hornig is professor emeritus of chemistry and environmental studies, Dartmouth College.

The Roman Empire at Bay, AD 180-395 Aug 22 2021 The Roman Empire at Bay is the only one volume history of the critical years 180-395 AD, which saw the transformation of the Roman Empire from a unitary state centred on Rome, into a new polity with two capitals and a new religion—Christianity. The book integrates social and intellectual history into the narrative, looking to explore the relationship between contingent events and deeper structure. It also covers an amazingly dramatic narrative from the civil wars after the death of Commodus through the conversion of Constantine to the arrival of the Goths in the Roman Empire, setting in motion the final collapse of the western empire. The new edition takes account of important new scholarship in questions of Roman identity, on economy and society as well as work on the age of Constantine, which has advanced significantly in the last decade, while recent archaeological and art historical work is more fully drawn into the narrative. At its core, the central question that drives The Roman Empire at Bay remains, what did it mean to be a Roman and how did that meaning change as the empire changed? Updated for a new generation of students, this book remains a crucial tool in the study of this period.

Saving Upper Newport Bay Jul 01 2022 During Orange County's population boom in the early 1960s, the Robinson family moved to Newport Beach. A short walk from their home was Upper Newport Bay, where they and their neighbors could play on North Star Beach, water ski on the bay's calm water, or dig in the shallow mudflats for fresh clams for dinner. But land developers and local government officials had a different use for the open space in mind—build a private harbor much like the bustling lower Newport Bay and Balboa Island. In 1963, 14-year-old Jay Robinson rode his bike down to North Star Beach and found a newly erected "private property" sign. His parents, Frank and Frances Robinson, would soon find themselves embroiled in one of the most important ecological battles in California, with friends, neighbors, newspapers, the government, and the courts all taking sides. Saving Upper Newport Bay is the story of two ordinary people's life-changing journey, which ultimately impacted the history and ecology of southern California. This book was produced on the 50th anniversary of The Newport Bay Conservancy, which focuses exclusively on the conservation and restoration of Upper Newport Bay. Included are full color photos depicting the history of the bay.
